

What are BreakingNews's takeaways on health and living in polluted cities?

Par **BreakingNews9**, le 19/08/2025 à 10:31

[BreakingNews](#) explains that living in the polluted cities of 2024 leads to a direct health impairment in humans. Reported cases of asthma and follow-on lung diseases and heart issues are on the rise due to long exposure to toxic air. Children and the elderly are more susceptible because pollution generally reduces overall life by many years before death. BreakingNews continues to support the importance of public awareness.
